Purge Data

The Purge tool removes attribute data from FredoSpline curves
Once data are purged, they become regular SketchUp curves

▶Purging curves

With Preselection

- Launch the Purge tool with a prelection
- All FredoSpline curves enclosed in the selection at any level will be highlighted in red
- **Click** **anywhere** to purge the FredoSpline data from these curves
- After purging, you can select interactively other curves for purge...
- ...or **Click in empty space** to exit

Interactive (no preselection)

- Launch the Purge tool with <u>no</u> preselection
- **Hover** over a curve
- The curve will be shown red
- **Click** to perform the purge of FredoSpline data
- You can hover over **other curves** and apply the same method
- **Click in empty space** to exit

▶Show / Hide curve vertices

You can display or hide the vertices of the curves
This option is available for all tools

To show / hide vertices...

- From the option bar

- From the toggle buttons

- From the **VCB**: type ***** to toggle display
- From the contextual menu
