nomeradona SketchUp Vray Resources

We hope through this blog we can share to the community different resources that we know and have: Vismats, Visopts, SketchUp models and components with Vray settings ready to be imported to a new scene, textures, hdri, written and video tutorials, links, ies data and others. This blog does not encourage publishing here illegal materials(textures, components, hdri, ies data etc.)

Home	BEST 3D WAREHOUSE MODELS	Free SketchUp Scenes and Models	Vismats, Visopts and IES data	Free Textures including HDRI	Tutorials & "The Making"

All resources offered by this blogsite are shared by the authors themselves. Some of them were rewritten with permission and some were collected through the internet and exchanged between peers for personal study. Use of any resources offered for commercial purposes is prohibited. Otherwise you need to be responsible for any consequences produced! Any profitable behavior of utilizing the resources downloaded from this site is condemned and disdained sternly. Some of the resources, and data here were shared by the authors freely and we don't have all the capacity to know, if the components inside the scenes were copyright protected. If you feel some resources have infringed your copyright, Please contact us, we will delete it as quickly as possible, we won't bear any legal responsibility for the resources. Thanks.

Welcome to SketchUp, Vray and other Resources

I believe that everyone is capable of learning. Learning should be part of life. It is a social process of living and bringing everyone to share in the inherited resources that has been discovered. I believe all of us can influence the life of others in whatever nationality we are, whatever field we are, whatever area we live, and whatever means we have. We learned because someone has provided and shared their experience to us. Somebody had led us to a mind of knowledge and a place where we can find tools that are critical to learning.

I am putting all the important visualization resources; tutorials, tips, tricks, and links which I knew. I am sharing here knowledge by way of tutorials that I discovered through personal experimentation or from inspiration from someone. I hope that you will find here tools (textures, materials, hdri, ies files etc.) which will help in enhancing your visualization process and will spark your creativity. I also hope that you will be inspired from other visualizers, artists and individuals in the same field that you have.

Yours,

Nomeradona

Tutorial: Grass and Rock Displacement in Vray SketchUp

Vray SketchUp does not support Proxy at the moment, unlike Vray 3dsMax. Creating realistic grass seems to be challenge still. In the past the solution that I mostly recommend is using channels like in this POST .

Two of our Filipino Visualizers, Zernan Suarez and Rhen Badando, attempted to create very informative displacement tutorial how to achieve realistic grass and rock materials. I should say, this technique works pretty well. Here are their tutorials.

ZERNAN SUAREZ aka. "ZDesign"

Here's my visual tutorial on how to make the grass or even carpet looks uneven/ripple using bump and displacement and noise adjustments.
