

Ok here goes ...my first test "research" attempt at comparing the different inside SU choices.

If I am misinformed on anything I am about to say please correct me!

Under 5 Min Test

---

IDX Renditioner 1.7 Min

Podium – 3 Min

+5 Min Test

---

IDX Renditioner - 6.75 Min

Indigo – 5 Min

Podium – 8 Min

Twilight – 5.25 Min

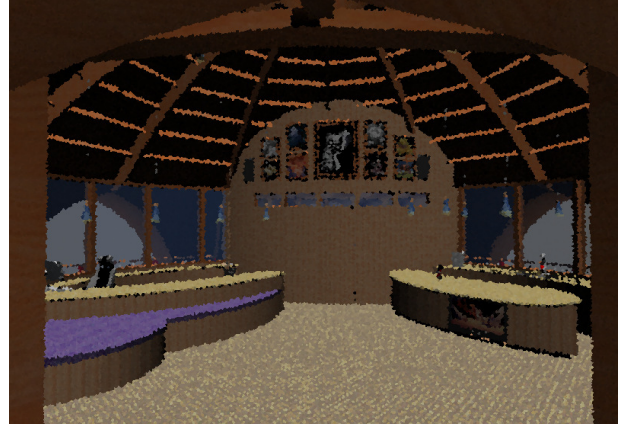

+ 10 +15 Min Test

IDX Renditioner – 10.15 Min

Shaderlight – 10 Min

IDX Renditioner – 14.9 Min

Twilight – 15.6 Min

Indigo – 15 Min

Shader Light - 1 Hr

IDX Renditioner - 1.6 Hrs

Twilight – 2.5 Hrs

I still cannot get either; "Lightup" or "I Render NXT" to load. So when I can, I will get those two and compare it to whichever of these above I choose to be the "best". So far IDX Renditioner looks the most promising? I liked the lights in Twilight and IDX Renditioner. I attached them to existing light components and they seemed to work well. I still need to understand how scaling them affects the light pattern. I basically had to move lights farther away to get the right radius, the free versions probably do not allow too many adjustments? All that is needed is a start point, an end point and radius at that chosen distance. The only problem I had with Podium was trying to attach the light to an existing component, which is critical! I could not? I had to put the lights in there one at a time and then go back and individually adjust each one, one at a time to get something decent, lots of time! But the tests go on, I'll keep you posted if anyone is still interested?

Matte

Shader light – 3 Hrs
